FONTAINE® STARTS A REVOLUTION™ IN THE TRAILER INDUSTRY

HALEYVILLE, ALABAMA -- Fontaine® Trailer, the recognized technology leader in the flatbed trailer industry, is launching a revolutionary aluminum trailer that weighs 8,000 lbs and handles a 60,000 lbs load concentrated in just four feet! The trailer industry has never seen numbers like these before. That's why Fontaine® calls this new marvel of innovative design – the Revolution™.

When you see the Revolution™ the first thing you notice is the sleek, aerodynamic shape that is designed to cut through the air with a drag coefficient never before achieved on a flatbed trailer. The unitized design uses friction-stir welding, proven technology borrowed from the aerospace industry, to add strength while reducing weight to give you bigger payloads and more miles per gallon. The patent-pending one-piece extruded aluminum siderail looks great and withstands impact damage better than steel siderails. An integrated load securement system makes loading and unloading faster, safer and much more driver friendly.

Fontaine® Trailer Company produces a complete line of aluminum, steel and composite trailers for the flatbed, dropdeck and lowbed markets. Manufacturing facilities are located in Haleyville, Jasper and Springville, Alabama; and Kent, Ohio. For more information contact Buck Buchanan, Fontaine Trailer Company • 3515 Industrial Way, Jasper, Alabama 35501 • 800-821-6535 • www.fontainetrailer.com

XXX

Fontaine Trailer Company, headquartered in Jasper, Alabama, is a Marmon Highway Technologies company that is the leading North American manufacturer of platform trailers. MHT companies support the transportation industry worldwide with a wide range of high quality products and services.
